

Committee members consists of Nancy Ide, Brice McKane, Susan Rothstein, Judy Pachter, and Toby Wright (Chair). This Committee was formed in 2020 but addressed land use issues that have been discussed for decades. The Committee has been graciously assisted by Lynn Bowman, Dr. Jay Fleisher, Joe and Laurie Hutcheson, Rachel Pachter, and others not members of the CHCCA. Our sincere thanks to all who supported this Committee.

## **History**

The last Sand Path Committee Summary and Recommendations was submitted on October 2, 2020 (file: 2020\_10\_02\_Sand\_Path\_Committee\_Summary\_Recommendations\_Final.docx). That report provided the following:

- a history of the sand path and related issues,
- reiteration of the Committee charter and tasks,
- a summary of legal and access equity issues addressed,
- a summary of environmental issues addressed,
- a summary of expert resources identified by the Committee,
- a summary of specific proposals received from some of the identified resources,
- a summary of Committee findings, and
- Committee recommendations and thoughts on planning for beyond 2020.

An emergency meeting of trustees took place in August and decided that path is closed. During the CHCCA 2020 Annual Meeting it was identified that any erosion mitigation on property the coastal bank will need permitting. The Committee was directed to continue its work in 2021 and was to focus on hiring a generalist, have overall responsibility of providing direction and oversight of the generalist. The budget for the effort was estimated to be \$3,000 and funding will be provided by McKane, Pachter, Bowman/Mayers and Wright.

## **2021 Committee Status Update**

Little progress has been made this year, due primarily to inaction by the Committee Chair in following up with Committee members and external resources. Informal canvassing of the Committee indicates that Jim O'Connell of Coastal Advisory Services is the preferred resource to be hired. A recent call to Coastal Advisory Services indicated that the office is closed and only personal calls are being accepted. A request to Coastal Advisory Services has been made to clarify if services are still available from that organization.

## **Planned Future Committee Activities**

The Committee Chair will canvas the Committee members to ascertain what are the proposed next steps.
